-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I - Figures 2 and 3

Species II - Figures 4 and 5

Species III - Figure 6

Species IV - Figures 7 and 8

Species V - Figures 9 and 10.

The species are independent or distinct because: they all require a different base/support structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 3635

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

During a telephone conversation with Mr. Kahm on 03/20/2006 a provisional election was made with traverse to prosecute the invention of Species I, claims 1, 2, 3, 4, 5, and 7. Affirmation of this election must be made by applicant in replying to this Office action.

Upon examination of the case, the examiner determined Species I to be directed to claims 1, 2, and 3. Therefore claims 4-11 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Sorkin (6684595).

In regards to claim 1: Sorkin discloses a rebar spacer (130; Figure 8) comprising, a clip (136) having a "U" shaped rebar receiving portion (138) for receiving a rebar, a pair columns (140) on either side of the "U" shaped rebar receiving portion

Art Unit: 3635

and extending upward therefrom (Col. 7, lines 66-67), a cross portion (142 and 144) on each column extending toward the opposing column (Col. 7, line 67 – Col. 8, line 4), an arm (146 and 148) extending angularly downward from the cross portion toward the center of the "U" shaped rebar receiving portion, a base (132 and 134) portion attached to the base of the clip for supporting the clip at a desired height.

In regards to claim 2: The rebar spacer as in claim 1 above, wherein the base portion has a flat base (132), a left wall (Figure 8) extending from the flat base to the bottom of the clip and center wall (Figure 8) extending from the base to the bottom of the clip and a right wall (Figure 8) extending from the flat base to the bottom of the clip.

In regards to claim 3: The rebar spacer as in claim 2 above, wherein the left and right walls are slanted inward from the edge of the flat base to the sides of the clip (Figure 8), and the center wall is perpendicular to the flat base and the base of the clip (Figure 8).
